Election/Restriction

Lack of unity is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

This application contains claims directed to more than one species of the generic invention. The species are:

- (1) growth factors, anti-apoptotic factors, killer genes, antiproteases, immunomodulators, tumor suppressor genes, genes inhibiting the cell cycle
- (2) endothelial cells, epithelial cells, cerebral cells, retinal cells

These are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. Applicant is required to select one species for examination practice.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: (1) Different species of gene product containing different structure with different function and different regulation and degradation pathway which influence cell growth and production, requires different technique for production and the use thereof; (2) Different species of cells containing different structure which requires different techniques for cell transfection, production and the use thereof. Further, 37 CFR

Art Unit: 1632

1.475 does not provide for multiple independent products, methods of manufacture and methods of use (37 CFR 1.475(d)). Therefore, The species listed above do not relate to a single general inventive concept under PCT Rule 13.1.

Further, claims 4-16 are multiple dependent claims that are unsearchable. Applicant is advised that proper amended claims should be submitted upon the species election.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liping Chen, whose telephone number is (703) 305-4842.
